SANITIZING WIPES

Mix together:

- 2 cups isopropyl alcohol 60%+ or Everclear
- 1 TBSP fractionated coconut oil, MCT oil or melted coconut oil
- 20-30 drops essential oil

Prep a roll of paper towels by cutting the roll in half and removing the cardboard center. Or, if you're lucky, locate some Kleenex brand hand towels which are thick and tri-folded.

Pour the liquid mixture over the paper towels ensuring they are well-saturated. If they're not fully saturated, add more alcohol. Store in a Ziplock bag or in a baby wipe container. Label with ingredients so your members know what's in them.
